Conqueror's blade spear guide.

The second effect allows you to put the herself in your pages in case of stunning. And your horse is endowed with an additional attack capacity. The damage affects all nearby targets. The main advantage of the weapon is mobility, the character quickly moves through the battlefield. It also reduces the damage received by 2%. The disadvantage of skill is the ability to divert the enemy from the attack. The effect stacked at 10 times and lasts 6 seconds. However, when the capacity is activated, the herself still begins to advance, which leads to damage from the enemy. In general, the skills are decent, but it seems that the weapon is weak. The third effect increases the chances of armor penetration by 2% per hit, at 10 times. Ideally, this skill is better started first by attacking an enemy herself to attack. But it is not worth focusing on differing goals, as well as the herself will not allow it to survive for a long time. At the moment, the "Swoop" ability is the "special weapon", where a skill combines three types of damage at the same time. As a result, the heate with the "theme" weapon on the battlefield looks like a dancer. Tell us that such indicators are disposed of in the third pumping third. An additional effect of skill is an increase in armor by 2% for each hit at 10 times and a decrease in damage by 2%. It is cutting, penetrating and crushing. For this reason, the use of skill becomes inappropriate. Enemies suffer 134% of base piercing damage and 1594 additional damage. This ability causes cuts in 76% of its basic statuses and an additional damage of 1178. When activated, the hersman on horseback gains speed and begins to quickly attack enemies. In addition, each weapon is projected for a different use of tanic maneuvers. He throws the launch in the air and then kicks him. In addition, the skills allow to cause damage to a blow. In the second attack, the hero begins to rotate the weapon and causes cuts in the amount of 153% of the base indicator and in 2253 additional damage units. As the correct selection of skills and the correct distribution of hero pumping for the acquired experience. This allows you to attack without causing damage if you are behind the back of allied units. The ability is endowed with several additional effects, which makes the ability very attractive. After being released, the hero jumps with a spear and flies forward as an arrow. The hero can cause a great deal of damage to the enemy hero, in the amount of 583% of the base penetration and 1058 additional damage units. However, there are several additional effects that make the ability very attractive. Based on this, the main parameter for pumping the hero is "Dechloric". The main damage is caused by penetrating damage, even the skills are sharp to hurt damage and penetration. The effect lasts 6 seconds. In addition, the Navy can be activated twice, almost at the same time. You can pump a little "strength". This will allow you to inflict a little more damage to the armored targets. The ability allows to activate twice, and the repeated attack causes the same damage. It is important to note that the boom weapon has skills that allow you to use the same skill twice. When used, it causes 61% of the damage caused by the reduction of the base and an additional 953 damage with cutting attacks. After using it once, you can immediately activate a second attack. In the game, Blade conquest, there are about 11 variants of weapons with different skill sets or abilities. The third effect lasts 6 seconds. Thanks to long arms, a large number of enemies can be reached. Are we missing a great game? The third feature increases armor penetration by 2% and reduces damage caused by 2%, can beATO © 10 times. The modest damage against Soldiers is disappointing. And that does not make sense to pump other parties if you slightly increase your sao reserve. Basically, a great pleasure is given by the speed of movement and crumbling attacks. In the third, the Haion deals 134% of the base piercing damage and 1594 plus drill damage points. Classify supported games make sure the game is written correctly. In the second use, the heate ends the sequence and causes 102% of damage to the base reduction and 2790 additional damage points. In prolonged battles and positions of maintaining, you need to choose a step ahead and two back. Within 6 seconds. Based on this, the most appropriate tactic is to support and choose the right moment. The use of use, the herself begins to rotate the launch and causes 214% of damage to the base reduction and 2790 additional damage points. Competent use in combat can bring the victory to the player and his team and then valuable rewards. Increases armor penetration by 2% and reduces damage received by 2%. In this case, all enemies that are at a certain distance receive damage. The "Spain" weapon attacks mele enemies with a certain distance. And the effect that increases the defense of the heate by 2% with a decrease in the enemy's damage by 2%. Weapon a € œldea € still has positive points and is able to repel enemy combatants. For the launch, they are projected skills that can cause much damage in a short time. When used, the heate lashes, causing 61% piercing damage and 901 additional damage. It works well by playing boxes and this is probably one of the reasons for which it makes sense to face the battlefield. From some point of view, the weapon a € œldea € without a horse anywhere. With this ability, the heate can cause 153% of the enemy-based drill damage and 2253 additional points of drilling damage to the third. You can use the skill twice. Complete a SA © rie kick attacks jumping jumping cause 246% of the base blow damage and an additional damage of 1407. Conclusion on the weapon "Lie", in the game conquest Blade. Skills will help increase the damage caused and temporarily disorient the enemy. Ideally, designed to reduce the opponent's block as it has this effect. In the second use, the hero will continue the series of attacks, which already cause 62% of the penetrating damage of the base indicator and 1276 additional damage units. And almost the whole attack is complete. It is important to use careful tactics and work with the support of allies, so that you can last longer on the battlefield. Getting prepared enough work, and heroes will win. Perhaps this is the most appropriate skill of the decisive, since the enemy hero cannot avoid an attack. All skills are quickly activated and produce a series of quick attacks for a certain period of time. And the correct pumping provides greater efficiency, can be increased by pumping and decent damage. It has an additional effect, equal to that of the selected skill. These indicators are available at the third level. Despite the weak armor for close combat, and this is a light and medium armor that does not allow you to stay under the attack of the enemy for a long time. The second removes the effects of the shell shock and lifts the hero to his feet. It is true that there are some skills that cause damage caused by the cut. The first feature allows you to divert flying arrows. This is one of the few skills whose damage is repelled by cutting indicators. An additional effect increases hero defense by 2% and reduces enemy damage by 2%. Since it will not be possible to repel the attack "shot gun". The first effect reflects flying arrows in the hero. This skill is a little remnant of Javelin playing, only the hero plays this dart with his foot.
